

Co-founder building an *AI-native SaaS* for water utilities by day. Fifteen years of **writing for engineers, shipping code, and running cross-functional GTM** for early-stage devtools — the T-shaped builder PostHog keeps looking for. **Vibecoded side projects count** — mine are in production.

01 THE FIT

"Development experience — vibecoded side projects still count "	► Shipping an AI SaaS in production: RAG + Claude API + Supabase. Frontend dev at NPS (3 yrs). Full-stack at Galvanize.
Targeting developers as customers / writing for technical audiences	► Solutions Eng Mgr at Homebot. Sr. Technical Consultant at Lytics (CDP). Head of MarTech at a geospatial startup. Engineers are my native audience.
Email campaigns, GTM campaigns, sales enablement	► End-to-end GTM at Teren (4× qualified leads). Lead scoring at Zayo (+15% conv, +30% closed deals). HubSpot / Klaviyo / Pardot / mParticle certified.
Familiarity with devtool products (nice-to-have)	► Building one. Use PostHog, Supabase, Vercel, Cloudflare Workers, Claude Code daily at Upstream.
Comfortable being very visible to users , leading weirdest ideas	► Co-founder. Investor pitches, regulator calls, conference outreach, pilot demos. Visibility is the job.

02 SHIP LOG · THINGS SHIPPED, NOT STRATEGIES WRITTEN

2024 → NOW · UPSTREAM AI · CO-FOUNDER

An entire AI SaaS, from zero

Wrote the MVP spec, picked the stack (Supabase + Voyage + Claude), built the website, signed **2** Colorado pilot utilities. **11**-table multi-tenant schema with RLS. getupstream.ai

2018-21 · TEREN · HEAD OF MARTECH

4× qualified leads, month over month

Owned web tech, content, persona work, email at a seed-stage geospatial startup. **10%** lift in lead gen from segmented landing pages alone.

2022 · ZAYO GROUP · MKTG AUTOMATION MGR

Lead scoring that moved closed-won 30%

Built process flows, profile grading, reporting dashboards. **15%** conv lift, **30%** closed-deal lift, **500** leads from one webinar series.

2015-18 · HOMEBOT · SOLUTIONS ENG MGR

Early team at a PropTech startup

Built the email-driven product, designed the schema for messy real-estate data ingestion, ran beta testing. Watched the company grow up.

2023 → NOW · SUNLIGHT MTN · DATA SCIENCE (SIDE)

Inventory & pricing optimization for a small ski/bike shop

Real data science project for a Glenwood Springs retailer: messy POS cleanup, product taxonomy restructuring, EDA on inventory and pricing distributions, roadmap toward demand forecasting. Jupyter notebooks, Cookiecutter Data Science layout. github.com/MappingKat/SunlightMtnRetail

2012-15 · NATIONAL PARK SERVICE · FRONTEND DEV

Maps used by millions of park visitors

Frontend on the NPS GIS team. Cartography that became [NPS Park Tiles](#), the official basemap. **20%** traffic lift, **90%** error reduction.

2018 · HOT OSM · VOLUNTEER

Training mappers in crisis zones

Contributed to [LearnOSM](#), official training material for the Humanitarian OpenStreetMap Team. Open source, 23+ languages.

03 STACK

Python JS / React Claude API + SDK RAG / pgvector Supabase PostHog Vercel
Cloudflare Workers SQL Jupyter Mapbox / ArcGIS HubSpot Klaviyo Pardot mParticle
Linear / GitHub Projects

04 EDUCATION

MTech, Data Science · Springboard · 2024 **MBA** · Quantic · 2021

BA, Geographic Info Science · Colgate · 2011

Full Stack Web Dev · Galvanize · 2014

For: PostHog · Developer Marketer
