

Katrina Engelsted

SALES SOLUTIONS ARCHITECT CANDIDATE · HERE TECHNOLOGIES

Boulder, CO · remote · katrina@engelsted.co · 774.239.8699 · linkedin.com/in/katrinae

CORE EXPERTISE

Solution Architecture & Discovery

- Technical discovery
- Enterprise solution design
- POC & evaluation leadership
- Architecture documentation
- Requirements translation

Location & Geospatial

- GIS & spatial analysis
- Geospatial risk modeling
- Drone & satellite ML imagery
- Spatial statistics

Cloud, Data & APIs

- BigQuery
- Python
- APIs
- Data warehousing (Snowflake)
- Salesforce CRM & API automation
- Customer data platforms

Customer & Cross-Functional

- Strategic account support
- Sales / Product / Eng / CS coordination
- Workshops & stakeholder comms
- Technical documentation

EDUCATION

BA, Geography (GIS), Honors
Colgate University **2011**

Honors thesis: spatial-statistics analysis using kriging, IDW, and local Moran's I.

MBA
Quantic School of Business and Technology
2021

SUMMARY

Customer-facing technical consultant with a **GIS foundation** and a career spent doing exactly what this role describes: sitting between enterprise customers and internal engineering, product, and sales teams to turn ambiguous requirements into working solutions. As a **Senior Technical Consultant** at Lytics, I led a multi-stakeholder enterprise engagement — tens of millions of records — using **BigQuery, Python, and APIs** to validate data and translate business requirements into a system engineering and business teams could both act on. At Teren, I worked on **geospatial machine-learning models** built from drone and satellite imagery, partnering daily across engineering, product, and sales for institutional customers. As a **Solutions Engineering Manager** at Homebot, I hired and managed a technical team while translating findings for non-technical stakeholders. I hold a BA in Geography (GIS), with Honors and a spatial-statistics thesis — the same technical foundation HERE's location platform is built on.

PROFESSIONAL EXPERIENCE

- Founding Technical Advisor — Upstream AI** **2026 – Present**
Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.
 - Lead technical discovery with operators; translate requirements directly into **product and architecture decisions**
 - Build **AI-agent workflows** (Claude Code sub-agents, RAG pipelines) that reduce manual work for non-technical end users
- Senior Technical Consultant — Lytics** **2022 – 2023**
Led a multi-stakeholder enterprise engagement (Whirlpool), owning solution design end-to-end.
 - Used **BigQuery, Python, and APIs** to validate data and translate business requirements into a working identity model across tens of millions of records
 - Coordinated across engineering, business, and client stakeholders to define requirements, resolve technical issues, and communicate findings
 - Documented architecture, assumptions, and implementation guidance for a customer-delivery playbook used across future engagements
- Marketing Automation Manager — Zayo Group** **2022**
 - Owned the **Salesforce CRM stack** end-to-end — APIs, Einstein, Marketing Cloud, integrations, and workflow automation; built reporting that lifted conversion 15%
- Head of Marketing Technology — Teren (formerly SolSpec)** **2018 – 2021**
Worked inside a geospatial-risk company serving institutional and government-adjacent customers.
 - Supported **machine-learning models** built from drone and satellite imagery to assess environmental risk on land, translating technical geospatial analysis into decision-ready information
 - Partnered daily across **engineering, product, and sales** throughout customer evaluations and technical validation
- Solutions Engineering Manager — Homebot** **2015 – 2018**
 - Hired, managed, and trained a technical team; translated technical findings into recommendations for **non-technical stakeholders**
 - Coordinated across product, engineering, and customer-facing teams to keep solutions moving in a fast-changing environment
- Frontend Developer, Digital Maps Team — National Park Service** **2012 – 2015**
 - Built **wildfire-perimeter and endangered-species mapping tools** for non-GIS field staff
 - Cartography work became **NPS Park Tiles**, the official basemap for park websites
- Early Career — Geospatial & Humanitarian Mapping — HOT OSM, Cadasta, Bonobo Conservation Initiative**
 - Humanitarian OpenStreetMap Team** — QGIS-based disaster-response mapping; **Cadasta** — land and resource-rights registry documentation
