Jacobs Hiring Team

Jacobs — Energy and Power

RE: BUSINESS ANALYST, ENERGY AND POWER

Dear Hiring Team,

I'm excited to apply for the Business Analyst role on the Energy and Power team. **My career has consistently involved the same core task this role is built around: taking complex technical work, data, and increasingly AI-driven systems, and turning them into something a client or cross-functional team can actually act on.**

As a Senior Technical Consultant at Lytics, I led an end-to-end enterprise engagement for Whirlpool involving tens of millions of records. I organized and analyzed the data using BigQuery, Python, and APIs, checked it against established baselines for consistency, and translated the findings into recommendations that both technical and business teams could act on — then documented the whole process in a playbook so the work could be reused. That combination of rigorous analysis and clear, client-ready communication is what I understand this role to need most.

I bring energy-sector experience directly relevant to this team as well. At Teren, a geospatial-risk company, I worked with machine-learning models built from drone and satellite imagery to assess environmental and infrastructure risk on oil and gas sites. I reviewed complex work processes and data and recommended improvements, and I partnered daily across Engineering, Product, and Sales for institutional and government-adjacent customers — the same technology-into-program-delivery work this role describes, just in a different corner of the energy landscape.

I also bring hands-on experience with the AI and automation piece of this role. In my current work advising an early-stage climate-technology startup, I build AI-agent workflows and RAG pipelines that turn technical information into tools non-technical users can actually rely on. Earlier in my career, at Zayo and Homebot, I built dashboards and reporting on a regular cadence, coordinated feedback from stakeholders across departments, and translated technical findings for non-technical audiences — the connective-tissue work between systems, data, and people that I understand this role to be centered on.

I'd welcome the opportunity to bring that combination of data analysis, energy-sector experience, and applied AI knowledge to Jacobs' Energy and Power team.

Thank you for considering my application. I'd love the opportunity to talk.

Warmly,

Katrina Engelsted

CORE EXPERTISE

Business & Data Analysis

- Data analysis & reporting
- Dashboards & visualization
- Trend analysis
- Technical options analysis
- Process improvement

Energy & Infrastructure

- Geospatial risk analysis (oil & gas)
- Environmental & regulatory compliance
- Infrastructure risk modeling
- Drone & satellite ML imagery

AI & Technology Integration

- AI-agent workflows
- RAG pipelines
- Technology implementation
- Automation

Stakeholder & Team Collaboration

- Cross-departmental coordination
- Client-facing communication
- Stakeholder feedback coordination
- Documentation & reporting

EDUCATION

MBA

Quantic School of Business and Technology
2021

BA, Geography (GIS), Honors

Colgate University 2011

Honors thesis: spatial-statistics analysis using kriging, IDW, and local Moran's I.

SUMMARY

Business and technical analyst with 10+ years translating complex technical, data, and **AI-driven** work into clear recommendations for cross-functional teams and clients. Experience spans enterprise data analysis and reporting (BigQuery, Python, APIs), **geospatial risk analysis for oil & gas and energy infrastructure**, CRM and marketing-technology operations, and building AI-agent workflows and dashboards for technical and non-technical stakeholders alike. Comfortable distilling complex issues into terms multiple audiences can act on, and coordinating feedback across teams and departments.

PROFESSIONAL EXPERIENCE

- **Founding Technical Advisor** — *Upstream AI*2026 — Present

Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.

- Analyze operator data and technical requirements, translating them into product and technology recommendations
 - Build **AI-agent workflows and RAG pipelines** that give non-technical users faster access to technical knowledge
- **Senior Technical Consultant** — *Lytics*2022 — 2023

Led an end-to-end enterprise engagement for Whirlpool involving tens of millions of records.

- Organized and analyzed data using **BigQuery, Python, and APIs**, validating consistency against established baselines
 - Translated technical findings into recommendations and implementation guidance for both technical and business audiences
 - Documented architecture, workflows, and decisions in a playbook used across future engagements
- **Marketing Automation Manager** — *Zayo Group*2022

- Owned the **Salesforce** technology stack end-to-end; built **dashboards and reporting** executed on a regular cadence
 - Analyzed technical options and coordinated with cross-functional stakeholders to translate requirements into system changes, lifting conversion 15%
- **Head of Marketing Technology** — *Teren (formerly SolSpec)*2018 — 2021

Worked within a geospatial-risk company serving institutional and government-adjacent energy customers.

- Analyzed **machine-learning models** built from drone and satellite imagery to assess environmental and infrastructure risk for **oil and gas sites**
 - Reviewed complex work processes and data, recommending improvements; partnered across Engineering, Product, and Sales to communicate tradeoffs
- **Solutions Engineering Manager** — *Homebot*2015 — 2018

- Translated customer requirements and technical findings into clear recommendations for non-technical stakeholders
 - Coordinated across Product, Engineering, and customer-facing teams, working across multiple departments to move solutions forward
- **Frontend Developer, Digital Maps Team** — *National Park Service*2012 — 2015

- Organized and presented complex spatial data via mapping tools and dashboards for non-technical field staff
 - Cartography work became NPS Park Tiles, the official basemap for park websites
