

CORE EXPERTISE

Customer Success & TAM

- Enterprise customer success
- Trusted-advisor relationships
- Onboarding to renewal lifecycle
- Expansion & opportunity ID
- Executive / C-level comms

Geospatial & Location Intelligence

- GIS & spatial analysis
- Geospatial risk modeling
- Drone & satellite ML imagery
- Spatial statistics

Data & Technical Skills

- SQL
- BigQuery
- Python
- APIs
- Data analysis & forecasting
- Salesforce CRM

AI & Workflow Automation

- AI-agent workflows
- RAG pipelines
- Time-to-value optimization

EDUCATION

MBA
Quantic School of Business and Technology
2021

BA, Geography (GIS), Honors
Colgate University 2011
Honors thesis: spatial-statistics analysis using kriging, IDW, and local Moran's I.

SUMMARY

Customer-facing technical consultant with a **GIS foundation** and 10+ years of enterprise technical customer success, solutions engineering, and technical consulting experience. I've owned enterprise engagements end-to-end using **SQL, BigQuery, Python, and APIs**, translated technical work into decisions executives and technical teams could both act on, and built **AI-agent workflows** to decrease time to value for end users. My BA in Geography (GIS), Honors, and a career spent on geospatial risk and mapping work make CARTO's mission of turning location data into decisions personally, not just professionally, compelling.

PROFESSIONAL EXPERIENCE

- **Founding Technical Advisor** — *Upstream AI*

2026 — Present

Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.

 - Build **AI-agent workflows and RAG pipelines** specifically to decrease time to value for non-technical end users
 - Lead technical discovery with operators, translating operational needs directly into product priorities
- **Senior Technical Consultant** — *Lytics*

2022 — 2023

Owned an end-to-end enterprise engagement for Whirlpool involving tens of millions of records.

 - Used **SQL, BigQuery, Python, and APIs** to validate data, troubleshoot issues, and design a working identity model
 - Translated technical findings into recommendations and implementation guidance for both technical and executive stakeholders
 - Documented architecture, assumptions, and decisions in a playbook used across future engagements
- **Marketing Automation Manager** — *Zayo Group*

2022

 - Owned the **Salesforce** technology stack end-to-end — APIs, integrations, reporting, and forecasting
 - Built automation and dashboards that lifted conversion **15%**, translating account-level data into actionable insight
- **Head of Marketing Technology** — *Teren (formerly SolSpec)*

2018 — 2021

Worked within a geospatial-risk company serving institutional and government-adjacent customers.

 - Worked with **machine-learning models** built from drone and satellite imagery to assess environmental and infrastructure risk
 - Partnered daily across Engineering, Product, and Sales throughout customer evaluations, evaluating tradeoffs and communicating findings
- **Solutions Engineering Manager** — *Homebot*

2015 — 2018

 - Led a customer-facing technical team; translated customer requirements and technical findings into clear recommendations for non-technical stakeholders
 - Coordinated across Product, Engineering, and customer-facing teams to move solutions from problem definition toward implementation
- **Frontend Developer, Digital Maps Team** — *National Park Service*

2012 — 2015

 - Built **geospatial applications** for non-GIS field staff, translating complex spatial data into tools people could actually use
 - Cartography work became NPS Park Tiles, the official basemap for park websites
