CORE EXPERTISE

Support & Program Strategy

- Support strategy development
- Product-launch planning
- Post-launch reporting & insights
- Issue triage & resolution
- Cross-functional program mgmt

Customer & Stakeholder Engagement

- Customer-facing consulting
- Enterprise stakeholder mgmt
- User advocacy
- Voice-of-customer synthesis

Data & Operations

- Data validation (BigQuery, Python, APIs)
- Process improvement
- Workflow optimization
- Salesforce CRM ownership
- Reporting & documentation

Cross-Functional Collaboration

- Product / Eng / Sales / CS coordination
- Workshops & stakeholder comms
- Technical documentation

EDUCATION

MBA
Quantic School of Business and Technology
2021

BA, Geography (GIS), Honors
Colgate University 2011

Honors thesis: spatial-statistics analysis using kriging, IDW, and local Moran's I.

SUMMARY

Customer-facing technical consultant and operations-minded program manager with an **MBA** and a career spent as the connective tissue between users, product, and engineering. I've led enterprise technical engagements end-to-end, owned CRM and workflow systems, and used data (BigQuery, Python, APIs) to validate problems and turn findings into recommendations both technical and non-technical stakeholders could act on. I'm drawn to user-advocacy work that sits at the intersection of product and support strategy — listening for friction points early, translating them into action, and building the cross-functional relationships that make launches go smoothly.

PROFESSIONAL EXPERIENCE

- Founding Technical Advisor — Upstream AI** 2026 – Present
Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.
 - Anticipate operator friction points and translate them into **product and support priorities** ahead of rollout
 - Build AI-agent workflows and RAG pipelines that give non-technical users faster, self-serve access to technical knowledge
- Senior Technical Consultant — Lytics** 2022 – 2023
Led an end-to-end enterprise engagement for Whirlpool involving tens of millions of records.
 - Conducted discovery across customer, business, and engineering stakeholders; used **BigQuery, Python, and APIs** to validate data and troubleshoot issues
 - Translated technical findings into a working identity model and implementation recommendations for both technical and business teams
 - Documented architecture, assumptions, and decisions in a playbook used across future engagements
- Marketing Automation Manager — Zayo Group** 2022
 - Owned the **Salesforce** technology stack end-to-end — APIs, integrations, Einstein, Marketing Cloud — improving workflows and optimizing processes
 - Built reporting and automation that lifted conversion **15%**, translating operational insights into system changes
- Head of Marketing Technology — Teren (formerly SolSpec)** 2018 – 2021
 - Supported technical evaluations and customer-facing solution development for institutional and government-adjacent customers
 - Partnered across Engineering, Product, and Sales to understand requirements, troubleshoot issues, and communicate tradeoffs
- Solutions Engineering Manager — Homebot** 2015 – 2018
 - Led a customer-facing technical Solutions Engineering team, including hiring, training, and development
 - Translated customer requirements and technical findings into clear recommendations for non-technical stakeholders
 - Coordinated across Product, Engineering, and customer-facing teams to move solutions from problem definition toward implementation
- Frontend Developer, Digital Maps Team — National Park Service** 2012 – 2015
 - Built mapping applications for non-technical field staff, translating complex spatial data into tools people could actually use
 - Cartography work became NPS Park Tiles, the official basemap for park websites
