

Katrina Engelsted

DATA AND ANALYTICS DIRECTOR CANDIDATE · THE WILDERNESS SOCIETY

Boulder, CO, USA · katrina@engelsted.co · 774.239.8699 · linkedin.com/in/katrinae

SELECTED OUTCOMES

+15% conversion

Salesforce lead-scoring & demand model, Zayo Group

10s of millions

of records unified into an identity model, enterprise CDP engagement, Lytics

Hired & managed

a technical team, Solutions Engineering, Homebot

SKILLS

Marketing Technology

- Salesforce
- Einstein
- Marketing Cloud
- Marketing automation
- Campaign management
- Demand-gen tech stack
- Enterprise CDP

Geospatial

- ArcGIS
- QGIS
- Mapbox
- Carto
- Spatial statistics
- Geoprocessing
- District-level reporting

Data Warehouse & Engineering

- Snowflake
- dbt
- SQL
- Python
- R
- ETL / pipelines
- Data schema design
- Identity resolution

AI & Automation

- Production AI agents
- Claude Code
- RAG pipelines
- Prompt libraries
- Responsible AI judgment

Analytics

- Segmentation
- Campaign & testing analysis
- Lead scoring
- Predictive/lifecycle modeling

Leadership

- Team hiring & management
- Cross-functional strategy

EDUCATION

BA, Geography (GIS), Honors

Colgate University 2011

Honors thesis: spatial-statistics study using kriging, IDW, and local Moran's I.

MBA

Quantic School of Business and Technology 2021

Data Science / ML Certificate

Springboard 2024

Capstone: R + Snowflake data-warehouse and pipeline build, AMI Program Implementation Assessment for a Colorado water utility.

SUMMARY

Data and analytics leader with deep roots in **marketing technology** and a genuine **geospatial background** that's rare in this field. I've owned marketing-technology stacks end-to-end — the Salesforce CRM and marketing-automation platform at Zayo, persona-driven campaign infrastructure at Teren — and I hold a BA in Geography (GIS), with Honors, and a spatial-statistics thesis, on top of three years building GIS mapping tools (ArcGIS, Mapbox, Carto) for the National Park Service. I've also worked inside an enterprise customer data platform (Lytics) and built a Snowflake-based data warehouse and pipeline for a utility-sector capstone. Right now, I'm building and governing **production AI-agent workflows** — Claude Code sub-agents, RAG pipelines, prompt libraries — as a startup advisor, and independently building a **semantic layer on top of dbt** to give a data warehouse governed, reusable metric definitions. I hired, managed, and trained a technical team at Homebot.

PROFESSIONAL EXPERIENCE

- **Founding Technical Advisor** — *Upstream AI*2026 – Present

- Build and govern **production AI-agent workflows** — Claude Code sub-agents, RAG pipelines, prompt libraries — integrated with a small startup's data systems, for non-technical end users
 - Independently building a **semantic layer on top of dbt** — governed, reusable metric definitions between the warehouse and reporting tools
 - Advise on where AI adds value and where it doesn't, for a regulated, risk-averse customer base
- **Sr. Technical Consultant** — *Lytics*2022 – 2023

- Worked inside an **enterprise customer data platform**, unifying customer data across systems into a single identity model
 - Owned a major engagement (Whirlpool) end-to-end — tens of millions of relational records translated into a usable identity model — and helped build the delivery playbook the team used going forward
- **Marketing Automation Manager** — *Zayo Group*2022

- Owned the **Salesforce CRM and marketing-automation stack** (Einstein, Marketing Cloud) end-to-end — campaign orchestration, lead routing, and reporting
 - Built the lead-scoring and demand model behind a **15% lift in conversion**
- **Head of Marketing Technology** — *Teren (formerly Solspec)*2018 – 2021

- Owned the company's **marketing-technology stack** — campaign management, marketing automation, and demand-gen tooling — and the **audience segmentation and persona-driven campaign strategy** built on top of it, quadrupling qualified leads
 - Partnered cross-functionally across engineering, product, and sales; supported institutional customer acquisition
- **Solutions Engineering Manager** — *Homebot*2015 – 2018

- Hired, managed, and trained** the Solutions Engineering team
 - Designed the data schema behind a messy real-estate dataset; built the lifecycle email product that drove millions of homeowner interactions
- **Frontend Developer, Digital Maps Team** — *National Park Service*2012 – 2015

- Built **wildfire-perimeter and endangered-species mapping** tools on ArcGIS, Mapbox, and Carto — spatial data cleanup, geoprocessing, and cartographic design end to end, for non-GIS park staff — the same geographic-reporting instinct advocacy work by state, district, or land unit depends on
 - Cartography work became NPS Park Tiles, the official basemap for park websites
- **Mapping Intern** — *Humanitarian OpenStreetMap Team*College era

- Mapped in **QGIS** for disaster-response and humanitarian relief efforts
