

Geographer turned data analyst. Fifteen years of applied analytics, GIS, and dashboard work — at the National Park Service, a customer data platform, a geospatial-risk startup, and now as **founding technical advisor** to a small water-utility software startup. **BA in Geographic Information Science (Honors)**, MTech in Data Science, MBA. Honors thesis used **ArcGIS spatial statistics** on 1,650 host-farm locations across the U.S. **Available full-time for a senior analyst role** where the GIS + R + dashboard toolkit can support real water-conservation and demand-modeling work.

01 THE FIT — JD LINE BY LINE

BA/BS preferred in science or math	► MATCH BA, Geographic Information Science, Honors (Colgate). Plus MTech Data Science (Springboard 2024) and MBA (Quantic 2021).
3+ yrs data analysis, RStudio required	► MATCH 15 yrs of applied data work. R + Python for EDA at Sunlight Mtn Retail; RStudio in the Springboard MTech curriculum; statistical analysis baseline since the honors thesis.
ArcGIS required , Excel + PowerPoint + Word required	► STRONG 3 yrs ArcGIS + Mapbox + Carto at NPS. Honors thesis built in ArcGIS. Excel / Word / PPT are native deliverable formats — shipping client decks + memos since 2012.
Other statistical packages required (R / SAS / SPSS / Python)	► MATCH R + Python (pandas, scikit-learn, statsmodels) + SQL. Reproducible notebooks + production pipelines both.
Power BI (preferred) / web data viz required	► STRONG Tableau, Looker, Mapbox, Carto, Observable, Plotly, D3, Recharts. Power BI = one-week ramp.
Snowflake (preferred) for client data	► ADJACENT Postgres + Supabase + BigQuery in production. Snowflake SQL + warehouse = one-week ramp.
Water demand + supply , conservation preferred	► MATCH 2 yrs advising a water-utility software startup w/ live Colorado pilots. Direct exposure to source-water planning, conservation messaging, drought response, consumption analysis.
Documented methods · reproducibility · comms / training	► STRONG 180-pg thesis w/ methods + appendices. README-first eng at Upstream. Wrote part of LearnOSM (HOT OSM, 23+ languages). Monthly operator trainings.

02 SHIP LOG — WATER + GIS + DATA WORK

2024 → NOW · UPSTREAM AI · FOUNDING TECHNICAL ADVISOR (PART-TIME) · BOULDER, CO

Founding advisor · early-stage *water-utility software* (pre-revenue)
Founding technical contributor to an early-stage platform serving 1-to-5-person water utilities in rural Colorado. **Two live pilots.** Built a RAG-powered document repository for utility SOPs / sampling plans / regulatory correspondence; an AI-assisted daily-operating-report workflow; SDWA compliance prep + monthly DMR drafting; Supabase + Recharts operator dashboards. **Pre-revenue side project — would step back to advisory for the right full-time analyst role.** Direct exposure to source-water planning, non-revenue water analysis, conservation messaging, and the realities of small-utility data quality. **getupstream.ai**

2011 · COLGATE HONORS THESIS · GEOGRAPHY

A Network of Alternative Economies
180-pg honors thesis. Geocoded 1,650 WWOOF host farms across the continental U.S., joined to county-scale Census + USDA + ERS datasets. Multivariable regression, location quotient, **local Moran's I, IDW interpolation, kriging**. 12 field interviews ground-truthing the spatial model.

2012 — 15 · NATIONAL PARK SERVICE · FRONTEND / GIS

Cartography behind *NPS Park Tiles*
3 yrs of GIS + cartography in ArcGIS, Mapbox, Carto. Built custom dashboards for NPS staff. My cartography became part of **NPS Park Tiles**, the official basemap behind park websites used by millions of trip-planners.

2023 → NOW · SUNLIGHT MTN SKI & BIKE · DATA ANALYST

EDA + anomaly detection · *ski / bike shop*

Cleaning messy POS data, restructuring an inconsistent product taxonomy, EDA on inventory + pricing distributions, outlier detection toward demand forecasting. **Same methodological shape as an AMI assessment** — just w/ skis instead of cubic meters per day.

2022 — 23 · LYTICS · SR. TECHNICAL CONSULTANT

Enterprise *customer data platform*

Got enterprise clients live on a CDP — translating "we want to know our customers" into SQL queries, segments, audiences, and data pipelines that actually shipped. Heavy reporting + dashboards layer.

2018 — 21 · TERE · HEAD OF MARKETING TECHNOLOGY

Seed-stage *geospatial risk* startup

3 yrs at a geospatial intelligence startup. Web tech, persona-driven funnels, campaign execution. **4x qualified leads**. Lived inside the geospatial-data world that overlaps directly with MWM's GIS scope.

2022 · ZAYO GROUP · MKTG AUTOMATION MANAGER

Lead scoring → *+30% closed deals*

Built lead-scoring process flows, ownership maps, deadlines, and dashboards. Made the system legible to sales leadership without overloading them. **+15% conversion, +30% closed-won**.

03 ANALYST TOOLKIT

JD-required

Adjacent · 1-week ramp

Working knowledge

RStudio

ArcGIS

MS Excel

MS PowerPoint

MS Word

Python · pandas · scikit-learn

SQL · Postgres · BigQuery

Power BI / Tableau / Looker

Mapbox · Carto · QGIS

Observable · Plotly · D3 · Recharts

Snowflake

Supabase · Airtable · Notion

Git · GitHub · Linear

Anthropic Claude · OpenAI API

04 RECEIPTS — WHAT MAKES THIS A REAL FIT

- ♦ **Water context by recent advisory work.** Two years as founding advisor to a pre-revenue water-utility software startup w/ live Colorado pilots. **I know SDWA, monthly reports, the texture of small-utility data, and what operators actually need from analysts.**
- ♦ **GIS by training.** 180-page honors thesis in spatial statistics (Colgate). 3 yrs of NPS cartography in ArcGIS + Mapbox + Carto. Comfortable w/ parcel + Census + utility-service-area data joins.
- ♦ **R + stats by recent retraining.** MTech in Data Science (Springboard 2024) — specifically refreshed the statistical toolkit on top of the GIS + engineering base.
- ♦ **Documentation by religion.** 180-pg thesis w/ methods + appendices, README-first engineering, reproducible notebooks. **Defensibility is a deliverable, not a chore.**
- ♦ **Public-good orientation.** National Park Service, HOT OSM (LearnOSM curriculum in 23+ languages), rural water utilities. Fifteen years finding work that matters to communities most software companies overlook.

05 EARLIER ROLES

2015 — 18 · HOMEBOT · SOLUTIONS ENGINEERING MGR

Early team · *PropTech startup*

Designed the data schema for messy real-estate ingestion. Shipped the email-driven product for agents + lenders. Built dashboards that made mortgage finance legible.

2011 · LEARNOSM · OPEN-SOURCE CONTRIBUTOR

Humanitarian OpenStreetMap *training curriculum*

Contributed to the official training material walking volunteers through tracing buildings + roads for disaster-response mapping. Translated into **23+ languages**.

06 EDUCATION

BA, GIS · *Honors*

COLGATE · 2011

Thesis: ArcGIS spatial stats on 1,650 WWOOF host farms — regression, IDW, kriging.

MTech, Data Science

SPRINGBOARD · 2024

RStudio + Python + statistical modeling — refreshed the analytics toolkit on top of GIS + eng.

MBA

QUANTIC · 2021

Strategy + finance + ops grounding to complement the technical background. Concentration in entrepreneurship.

Full-Stack Web Dev

GALVANIZE · 2014

Immersive program. Foundation for the engineering work at NPS, Homebot, Upstream.
