MBA

Quantic School of Business and Technology 2021

Data Science / ML Certificate

Springboard 2024

SUMMARY

Marketing generalist with five years in marketing- and demand-gen-titled roles (Teren, Zayo), inside a fifteen-year career spent translating technical products into positioning, campaigns, and stories that drive adoption. I'm currently building hands-on agentic AI workflows — Claude Code sub-agents, RAG pipelines, prompt libraries — as a startup advisor, which is direct, current experience with the kind of responsible AI-in-workflow fluency this role asks for. I'm comfortable owning a GTM narrative end-to-end: positioning, campaign execution, and the demand model behind it, reporting the results, and adjusting.

PROFESSIONAL EXPERIENCE

- **Founding Technical Advisor** — *Upstream AI* 2026 – Present

- Build **agentic AI workflows** — Claude Code sub-agents, RAG pipelines, prompt libraries — for a sustainability-focused startup's non-technical end users
 - Advise on go-to-market for a water-utility software product, including how the team talks about a new AI-native offering to a risk-averse buyer
- **Sr. Technical Consultant** — *Lytics* 2022 – 2023

- Owned an **enterprise B2B SaaS customer engagement (Whirlpool)** end-to-end — translated a relational SQL stack into a graph identity model at scale, tens of millions of records
- **Marketing Automation Manager** — *Zayo Group* 2022

- Built the **demand model** and lead-scoring system behind a **15% lift in conversion**, working from Salesforce data through to the number leadership reported on
 - Owned the Salesforce marketing stack (Einstein, Marketing Cloud) end-to-end
- **Head of Marketing Technology** — *Teren (formerly Solspec)* 2018 – 2021

- Built **persona-driven campaign and positioning strategy** for a B2B geospatial-risk product that **quadrupled qualified leads**
 - Partnered cross-functionally across engineering, product, and sales — the same three-way partnership this role calls for
- **Solutions Engineering Manager** — *Homebot* 2015 – 2018

- Built the **lifecycle email product** that turned a technical mortgage dataset into a story millions of homeowners actually opened and acted on
 - Trained beta customer cohorts and translated technical findings for a non-technical audience

ADDITIONAL EXPERIENCE

Business Analyst, Sunlight Ski & Bike (2025) — customer/product data and reporting for a small retail business. **Frontend Developer, Digital Maps Team, National Park Service** (2012–2015) — wildfire and endangered-species mapping tools for non-GIS park staff; cartography became NPS Park Tiles.
