

Strategic advisor for an *AI-native SaaS* for rural water facilities by day. Fifteen years of **writing for engineers, shipping code, and running cross-functional GTM** for early-stage startups — the T-shaped builder PostHog keeps looking for.

01 THE FIT

"Development experience — vibecoded side projects still count "	▶ Shipping an AI SaaS in production: RAG + Claude API + Supabase. Frontend dev at NPS (3 yrs). Full-stack at Galvanize.
Targeting developers as customers / writing for technical audiences	▶ Solutions Eng Mgr at Homebot. Sr. Technical Consultant at Lytics (CDP for enterprises). Head of MarTech at a geospatial startup. Engineers are my native audience.
Email campaigns, GTM campaigns, sales enablement	▶ End-to-end GTM at Teren (4× qualified leads). Lead scoring at Zayo (+15% conv, +30% closed deals). HubSpot / Klaviyo / Pardot / mParticle certified.
Familiarity with devtool products (nice-to-have)	▶ Worked at a Customer Data Platform — understand the pain of tools that are neither marketer-friendly nor developer-friendly. PostHog does both.
Comfortable being very visible to users , leading weirdest ideas	▶ Strategic advisor at Upstream. Building the brand voice, pivoting for quickest feature for traction, conference outreach, pilot demos. Visibility is the job.

02 SHIP LOG · THINGS SHIPPED, NOT STRATEGIES WRITTEN

2024 → NOW · UPSTREAM AI · STRATEGIC ADVISOR

Launched an AI-native SaaS to first pilot

Town of Alma, May 2026. Wrote the MVP spec, picked the stack (Supabase + Voyage + Claude), built the website, signed **2** Colorado pilot utilities. **11**-table multi-tenant schema with RLS. getupstream.ai

2022-23 · LYTICS · SR. TECHNICAL CONSULTANT

Lived inside the martech mess (it was brutal)

Implemented Lytics' **Customer Data Platform** for enterprise clients — translated "we want to know our customers" into queries, segments, and data pipelines that actually shipped. Got intimate with the data-engineering hassles and tool fragmentation **PostHog is building to fix**. I'm on your side of this fight.

2018-21 · TEREN · HEAD OF MARTECH

Went after whales (not fish) via thought leadership, conferences, partnerships, targeted ads

Owned web tech, content, persona work, email at a seed-stage geospatial startup. **4×** qualified leads MoM, **10%** lift in lead gen from segmented landing pages alone.

2022 · ZAYO GROUP · MKTG AUTOMATION MGR

Reworked the martech automation pipeline so sales had enriched, high-intent leads

Built process flows, profile grading, reporting dashboards. **15%** conv lift, **30%** closed-deal lift, **500** leads from one webinar series.

2015-18 · HOMEBOT · SOLUTIONS ENG MGR

Early team at a PropTech (real estate) startup

Built the email-driven product, designed the schema for messy real-estate data ingestion, ran beta testing. Watched the company grow up.

2023 → NOW · SUNLIGHT MTN · BUSINESS ANALYST (SIDE)

Product strategy + pricing fit for a real small business

Helped a Glenwood Springs ski/bike shop answer the same questions every scaling business asks — product mix, margin, pricing structure, repeat-customer drivers.

The exact questions PostHog users hit their analytics tool with, just at corner-shop scale. [Repo](#).

2012-15 · NATIONAL PARK SERVICE · FRONTEND DEV

Maps used by millions of park visitors

Frontend on the NPS GIS team. Cartography that became [NPS Park Tiles](#), the official basemap. **20%** traffic lift, **90%** error reduction.
