

Data-driven analyst and lifelong outdoor educator, applying for **Development Coordinator**. Fifteen years building donor-database-adjacent CRM systems, reporting dashboards, and fundraising-adjacent copy at startups — plus a parallel life of trail maintenance, whitewater canoeing, backpacking instruction, and PMBIA-certified mountain bike coaching. Nonprofit and conservation roots go back to college: internships at the Humanitarian OpenStreetMap Team and the Bonobo Conservation Initiative, an honors thesis in spatial statistics on alternative land economies, and current advisory work at a small water-utility conservation startup. This role is the rare place those two halves of a career finally combine.

01 · THE FIT — JD LINE BY LINE

"Manage the donor database and data integrity" (Salesforce highly desirable)	MATCH Enterprise CRM/CDP segmentation at Lytics, data-schema design at Homebot, POS/taxonomy cleanup for a small retailer. No Salesforce yet specifically — but a track record of getting fluent in a new data platform fast, on the job, every time.
"Draft fundraising copy for direct mail appeals, email newsletters, website landing pages"	STRONG Built the consumer email product at Homebot that millions of homeowners actually opened. Persona-driven campaign copy at Teren. Website copywriting is this entire personal site — happy to send more samples.
"Generate reports, dashboards, and donor segments to track fundraising progress"	STRONG Built dashboards for NPS rangers, ran segmentation/reporting at Lytics, full EDA + reporting on a mountain shop's inventory and pricing data. Comfortable in Excel, Sheets, and SQL daily.
"Coordinate event logistics ; recruit, train, and supervise volunteers"	STRONG PMBIA-certified coach running recurring group clinics — progression design, terrain selection, group management, every season since 2023. Led whitewater/backpacking groups through Colgate's outdoor ed program.
"Research grant opportunities; write and compile grant applications and supporting docs"	GROWTH AREA No formal grant-writing yet — but a research and long-form writing background including a 180-page honors thesis and a 37-page business plan with full budgets and financials. The research muscle transfers.
" Ability to lead or attend volunteer stewardship projects " (physical requirement)	STRONG Trail maintenance, backcountry travel, and group instruction outdoors is a current, real part of my life — not a resume line I'm reaching for.
Passion for public lands stewardship, conservation , community engagement	STRONG HOT OSM and Bonobo Conservation Initiative internships, honors thesis on alternative land economies, water-conservation-rates research, current advisory work at a water-utility conservation startup. A throughline, not a pivot.
High proficiency in MS Excel & Google Workspace; discretion with confidential donor financial data	STRONG Excel and Sheets are daily tools across every analyst role I've held. Comfortable handling sensitive customer and financial data with care — Homebot mortgage data, Lytics customer records.

02 · SHIP LOG — DIRECT RELEVANCE

PMBIA-Certified Mountain Bike Coach (*Independent*)

2023 → NOW · WHISTLER, BC CERT · COLORADO SEASONS

Recruiting, training, and running volunteer-style group instruction. Recurring women's skills clinics, middle-school coaching, and private sessions every season since certifying — progression design, terrain selection, and group management for riders who show up week after week. Plus Wilderness First Aid + CPR. **The closest analog in my life to recruiting, training, and supervising RFOV's project-day volunteers.**

Outdoor Education Instructor (*Colgate University*)

COLLEGE ERA · NEW HAMPSHIRE / NORTHEAST

Taught whitewater canoeing, backpacking, and trail maintenance through Colgate's Outdoor Education Program. Spent some of the best summers of my life on trail crews in the hills of New Hampshire — where the stewardship instinct started.

Retail Business Analyst (*Sunlight Mountain Ski & Bike*)

2023 → NOW · GLENWOOD SPRINGS, CO

Cleaned messy POS data, restructured an inconsistent product taxonomy, and ran EDA on inventory and pricing for a beloved local shop — the same skill set a small nonprofit's donor database needs, at the same scale and speed. github.com/MappingKat/SunlightMtnRetail

Sr. Technical Consultant (*Lytics*)

2022 — 23 · ENTERPRISE CDP

Built customer-data segments and delivery pipelines for enterprise clients, including a Whirlpool engagement translating tens of millions of relational records into a usable identity model. The closest professional analog to donor-database and segment work.

HOT OSM & Bonobo Conservation Initiative Internships

COLLEGE ERA

Humanitarian OpenStreetMap Team (mapping for disaster response) and the Bonobo Conservation Initiative (wildlife conservation). Went into nonprofits using software for good straight out of college — this isn't a new interest.

02 · Ship Log (continued)

Solutions Engineering Manager (Homebot)

2015 – 18 · PROPTech STARTUP

Designed the data schema for ingesting messy real-estate records and built the email-driven product that got millions of homeowners to actually open and act on a mortgage email — the direct-mail-appeal muscle, built at consumer scale. Hired and managed the SE team; trained beta cohorts.

Head of Marketing Technology (Teren, formerly Solspec)

2018 – 21 · GEOSPATIAL STARTUP

Built persona-driven campaigns and web tech that quadrupled qualified leads. Cross-functional across engineering, product, and sales — the same cross-team collaboration this role needs with RFOV's ED and Communications & Engagement Manager.

Frontend Developer, GIS (National Park Service)

2012 – 15 · PUBLIC LANDS

Built custom dashboards and mapping tools for NPS staff on the team behind NPS Park Tiles. Public-lands mission work, from the inside, years before it was a job search theme.

Founding Technical Advisor (Upstream AI)

2024 → NOW · WATER-UTILITY CONSERVATION STARTUP

Part-time advisory role building software for small drinking-water and wastewater utilities running on spreadsheets and tribal knowledge. Structured deliberately to leave room for a full-time seat like this one.

03 · TOOLKIT

Donor comms: fundraising & marketing copy, email campaigns, direct-mail-style messaging, website copy

CRM / data platforms: Lytics CDP, Postgres, Supabase, BigQuery, Snowflake — new platforms picked up fast

Outdoor / stewardship: PMBIA coaching cert, Wilderness First Aid + CPR, whitewater canoeing, backpacking & trail-maintenance instruction

Data & reporting: Excel (pivot tables, sorting), Google Sheets, SQL, dashboards, segmentation
Office & workspace: Microsoft Office Suite, Google Workspace, Notion, Airtable
Event & volunteer ops: recruiting, training, and running recurring group clinics; group logistics and safety

04 · RECEIPTS — WHY THIS IS A REAL FIT

- ◆ **Database & data integrity.** Enterprise CRM segmentation at Lytics, schema design at Homebot, POS/taxonomy cleanup at Sunlight Mountain. New platforms are a fast study for me, every time.
- ◆ **Donor communications.** A decade of writing that gets people to act — the Homebot email product, Teren campaign copy, and this entire personal site as a writing sample.
- ◆ **Volunteer recruiting & event logistics.** PMBIA-certified coach running recurring group clinics since 2023, plus a college career teaching whitewater, backpacking, and trail maintenance.
- ◆ **Conservation is the throughline.** HOT OSM and Bonobo Conservation Initiative internships, spatial-statistics honors thesis, water-conservation research, current water-utility advisory work.
- ◆ **Regional commitment.** Currently in Boulder, ready to relocate to the Roaring Fork Valley — a landscape I grew up around.

05 · EDUCATION

BA, Geography (GIS) · Honors
COLGATE · 2011

Honors thesis: 180-page spatial-statistics study of 1,650 WWOOF host farms — regression, kriging, Moran's I.

Outdoor Education Program
COLGATE · COLLEGE ERA

Instructor: whitewater canoeing, backpacking, trail maintenance. Trail-crew summers, New Hampshire.

MBA · ML/Data Science
QUANTIC 2021 · SPRINGBOARD 2024

Strategy, finance, and ops; Python-first data-science curriculum with an R + Snowflake capstone.
