Claude Code

RAG pipelines

Prompt libraries

Workflow automation

Finance & Admin

Budget & vendor tracking

Inventory management

Onboarding support

Communication

Written & verbal comms

Cross-functional coordination

EDUCATION

MBA

Quantic School of Business and Technology
2021

Coursework in finance, accounting, and operations — the foundation behind budget tracking, expense coding, and financial judgment.

BA, Geography, Honors

Colgate University 2011

SUMMARY

Operations generalist with fifteen years inside lean, mission-driven teams — hands-on CRM administration (Salesforce Einstein and Marketing Cloud at Zayo; enterprise CDP data hygiene and reporting at Lytics), process documentation (I helped build the customer-delivery playbook at Lytics), and day-to-day operations at small businesses and seed-stage startups. An **MBA** underpins my comfort with numbers and process — budget tracking, expense coding, reconciling a list that doesn't add up. I'm currently building **AI-agent automations** — Claude Code sub-agents, RAG pipelines, prompt libraries — as a startup advisor, exactly the kind of manual-work automation this role is asking for. I genuinely care about climate action, and I'd be glad to be in the Salida, CO office — I already have close friends there.

PROFESSIONAL EXPERIENCE

- Founding Technical Advisor — Upstream AI** 2026 – Present
 - Build **AI-agent automations** — Claude Code sub-agents, RAG pipelines, prompt libraries — that take manual, repetitive work off a small team's plate
- Business Analyst — Sunlight Ski & Bike, Glenwood Springs, CO** 2025 – May 2025
 - Managed inventory, vendor relationships, and pricing for a small retail business
 - Organized community events — group rides and women's bike mechanical classes — handling logistics, vendors, and RSVPs
 - Cleaned and standardized thousands of inconsistent customer and product records for accurate reporting
- Sr. Technical Consultant — Lytics** 2022 – 2023
 - Administered an **enterprise customer data platform** — data hygiene, field structure, and reporting — on a major account, tens of millions of records
 - Helped build the **customer-delivery playbook** (SOP) the team used on future engagements
- Marketing Automation Manager — Zayo Group** 2022
 - Owned **Salesforce CRM administration** end-to-end (Einstein, Marketing Cloud) — data hygiene, automations, and reporting
 - Built lead-scoring and reporting automations that lifted conversion 15%
- Head of Marketing Technology — Teren (formerly Solspec)** 2018 – 2021
 - Owned the tech stack and day-to-day operations at a **seed-stage startup** — comfortable with shifting priorities and wearing several hats at once
 - Partnered cross-functionally across engineering, product, and sales
- Solutions Engineering Manager — Homebot** 2015 – 2018
 - Hired, onboarded, and managed** the Solutions Engineering team at an early-stage startup
 - Designed the data schema behind a messy real-estate dataset
