CORE EXPERTISE

Solution Architecture & Discovery

- Technical discovery
- Requirements translation
- Enterprise solution design
- Technical validation
- POCs & evaluations
- Architecture documentation

Data, APIs & Technology

- Python
- BigQuery
- APIs & integrations
- Data architecture
- Salesforce
- Snowflake
- Customer data platforms

Location & Geospatial

- GIS & spatial analysis
- Spatial statistics
- Geospatial risk modeling
- Drone & satellite imagery
- Location-based applications

Customer & Cross-Functional

- Enterprise customers
- Strategic account support
- Sales / Product / Eng / CS coordination
- Workshops
- Technical presentations
- Stakeholder communication

EDUCATION

MBA

Quantic School of Business and Technology
2021

BA, Geography (GIS), Honors

Colgate University 2011

Honors thesis: spatial-statistics analysis using kriging, IDW, and local Moran's I.

SUMMARY

Customer-facing technical consultant and solutions engineer with a **GIS foundation** and 10+ years translating complex customer problems into practical technical solutions. Experienced in enterprise discovery, solution design, data and API integrations, technical validation, and cross-functional work across Sales, Product, Engineering, and customers. Brings a particularly strong location-technology background spanning GIS, spatial analysis, satellite and drone imagery, and geospatial applications.

PROFESSIONAL EXPERIENCE

- **Founding Technical Advisor** — *Upstream AI* 2026 – Present

Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.

- Lead technical discovery with utility operators, translating operational needs into product requirements and architecture decisions
 - Build AI-agent workflows and RAG pipelines that turn complex technical information into usable tools for non-technical end users
- **Senior Technical Consultant** — *Lytics* 2022 – 2023

- Led an end-to-end enterprise engagement for Whirlpool involving **tens of millions of records**, working across customer, business, and engineering stakeholders
 - Conducted discovery and requirements analysis; used **BigQuery, Python, and APIs** to validate data, troubleshoot issues, and design a working identity model
 - Translated technical findings and business requirements into recommendations and implementation guidance that both technical and business teams could act on
 - Documented architecture, assumptions, workflows, and technical decisions in a customer-delivery playbook used across future engagements
- **Marketing Automation Manager** — *Zayo Group* 2022

- Owned the **Salesforce** technology stack end-to-end, including APIs, integrations, Einstein, Marketing Cloud, data workflows, and automation
 - Partnered with business and technical stakeholders to translate requirements into system changes, reporting, and automated workflows
 - Built reporting and automation that lifted conversion **15%**
- **Head of Marketing Technology** — *Teren (formerly SolSpec)* 2018 – 2021

- Worked within a geospatial-risk company serving institutional and government-adjacent customers, supporting technical evaluations and customer-facing solution development
 - Worked with **machine-learning models** built from drone and satellite imagery to assess environmental and infrastructure risk, translating complex geospatial analysis into decision-ready information
 - Partnered across Engineering, Product, Sales, and customers to understand requirements, evaluate technical approaches, troubleshoot issues, and communicate tradeoffs
- **Solutions Engineering Manager** — *Homebot* 2015 – 2018

- Led a technical Solutions Engineering team, including hiring, training, and development, while supporting customer-facing technical engagements
 - Translated customer requirements and technical findings into clear recommendations for non-technical stakeholders
 - Coordinated across Product, Engineering, and customer-facing teams to move complex solutions from problem definition toward implementation
- **Frontend Developer, Digital Maps Team** — *National Park Service* 2012 – 2015

- Built **geospatial applications** for non-GIS park staff, translating complex spatial data and workflows into tools field users could actually use
 - Developed wildfire-perimeter and endangered-species mapping tools inside federal science infrastructure
 - Created cartographic work that became **NPS Park Tiles**, the official basemap for National Park Service websites
- **Early Career** — **Geospatial & Humanitarian Mapping**

Humanitarian OpenStreetMap Team · Cadasta · Bonobo Conservation Initiative

- QGIS-based disaster-response mapping, land and resource-rights registry documentation, and conservation mapping
