

Katrina Engelsted

PRODUCT SPECIALIST CANDIDATE · HALTER

Boulder, CO · ready to travel (domestic & international) · katrina@engelsted.co · 774.239.8699 · [linkedin.com/in/katrinae](https://www.linkedin.com/in/katrinae)

CORE EXPERTISE

Product & Customer Translation

- Voice-of-customer synthesis
- Field-based product feedback
- Cross-functional project leadership
- Requirements translation
- Customer adoption & success

Agriculture & Land

- Organic & regenerative farming
- WWOOF farm fieldwork
- Land-use & spatial analysis
- Grazing & conservation land mgmt
- Environmental stewardship

Geospatial & Technical

- GIS & spatial statistics
- Drone & satellite ML imagery
- Data interpretation
- Salesforce CRM

Operations

- Cross-functional coordination
- Travel-ready field ops
- Documentation & SOPs
- Project management

EDUCATION

BA, Geography (GIS), Honors

Colgate University 2011
Honors thesis: spatial-statistics analysis (kriging, IDW, local Moran's I) of organic & regenerative farming patterns.

MBA

Quantic School of Business and Technology 2021

SUMMARY

Product specialist and customer-facing technologist pulled toward land and agriculture from every direction — an Honors thesis mapping spatial patterns in **organic and regenerative farming**, hands-on fieldwork on organic farms through **WWOOF**, and a career spent as the translation layer between engineers and the people actually working the land. At **Teren** and the **National Park Service**, I built geospatial tools for non-technical field users; at **Homebot** and **Lytics**, I turned customer reality into product priorities; and at **Upstream AI**, I currently advise an early-stage ag-adjacent water-utility startup on that exact operator-to-roadmap translation. I'm looking to build a career — and eventually a ranch of my own — around the kind of hands-on land stewardship Halter is transforming.

PROFESSIONAL EXPERIENCE

- Founding Technical Advisor — Upstream AI** 2026 — Present
Advise an early-stage climate-technology startup building software for small drinking-water and wastewater utilities.
 - Translate **operator needs** directly into product priorities and roadmap decisions, sitting between field reality and engineering
 - Spend time understanding the day-to-day operational and regulatory constraints of small utility operators
 - Build AI-agent workflows to give operators faster access to technical knowledge
- Senior Technical Consultant — Lytics** 2022 — 2023
Led a multi-stakeholder enterprise engagement, translating a complex data problem into a usable system.
 - Coordinated across engineering, business, and client teams to define requirements and resolve data issues
 - Synthesized technical findings into recommendations non-technical stakeholders could act on
- Head of Marketing Technology — Teren (formerly SolSpec)** 2018 — 2021
Worked at the intersection of geospatial technology and land-based environmental risk.
 - Supported **machine-learning models** using drone and satellite imagery to assess environmental risk on land, including habitat and hydrology conditions
 - Partnered across engineering, product, and sales to translate technical geospatial analysis into usable field information for institutional customers
- Solutions Engineering Manager — Homebot** 2015 — 2018
 - Hired, managed, and trained a technical team; translated customer research into product and business recommendations for non-technical stakeholders
 - Coordinated across product, engineering, and customer-facing teams in a fast-changing environment
- Frontend Developer, Digital Maps Team — National Park Service** 2012 — 2015
Built geospatial tools for non-GIS field staff.
 - Built **wildfire-perimeter and endangered-species mapping tools** designed for park rangers and field staff without technical backgrounds
 - Cartography work became **NPS Park Tiles**, the official basemap for park websites
- Marketing Automation Manager — Zayo Group** 2022
 - Owned the **Salesforce CRM stack** end-to-end; built reporting and automation that lifted conversion 15%
- Field & Land Roots**
WWOOF · Humanitarian OpenStreetMap Team · Cadasta · Bonobo Conservation Initiative
 - WWOOF** (Worldwide Opportunities on Organic Farms) — hands-on labor and learning on organic farms
 - Humanitarian OpenStreetMap Team** — QGIS-based disaster-response mapping
 - Cadasta & Bonobo Conservation Initiative** — land and resource-rights documentation, wildlife conservation
